DETAILED ACTION

Introduction

1. The Examiner has carefully considered Applicants' amendments and remarks filed on 5/5/2005. Applicants' amendments to claim 31 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Rejections not maintained are withdrawn.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3 and 31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 5 of U.S. Patent No. 6,818,728. Although the conflicting claims are not identical, they are not patentably distinct from each other. Specifically, upon reconsideration, it is noted that

Art Unit: 1771

claims 1 and 5 of US '728 claim "A polyketone solution which comprises a polyketone containing a ketone unit ... as a main repeating unit ... a solvent for dissolving the polyketone ... is an aqueous solution containing zinc chloride and calcium chloride, the weight ratio of zinc chloride and calcium chloride is 29/71-44/56, and the total concentration of the zinc chloride and calcium chloride in the solution is 58-64% by weight" and "A polyketone solution ... wherein the polyketone concentration is 1-40% by weight", respectively, anticipate each element of claims 1-3 and 31 of instant invention as claimed.
